

Centralisers form part of our Well Start service - complete comprehensive support for the crucial first days of drilling.

PRODUCT APPLICATIONS

- Subsea and Surface
- Internal
- Retrofit or Bespoke

PRODUCT BENEFITS

- Reduces conductor movement and damage to the jacket guide and conductor, plus significantly reduce flowline and tree movement
- Provides concentricity for conductors - improving fatigue life, strength and stability
- Well Start service solution - not only experts in the design and build of centralisers, but also experts in conductor analysis, offshore operations, tiebacks, installation and early stage well construction
- Innovative design facilitates fast and safe installation via use of hinges and installation unit

PRODUCT TYPES

- Adjustable and flush surface cellar deck
- Fixed blade
- Retrofit drop-in
- Offset retrofit
- Inner casing
- Polymer coating available
- Remotely adjustable
- Bespoke

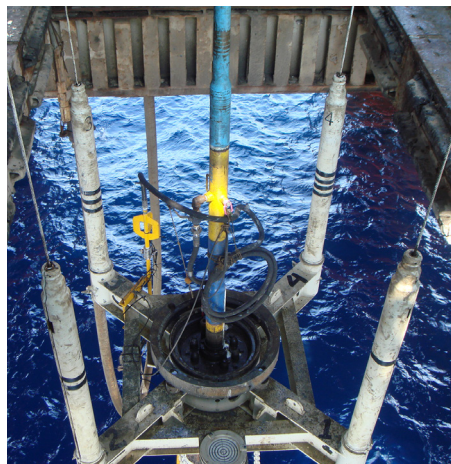

OTHER PRODUCT FEATURES:

- Aquaterra Energy are the only supplier to have provided centralisers with 50 year design life
- Stringent finite element modelling to present an optimum design which meets industry codes and standards; requiring no maintenance and guaranteed to last for the full life span of the asset
- Unique coating technology developed in conjunction with The Welding Institute (TWI)
- Bespoke design capabilities to suit any application
- Experts in conductor tensioning and support
- Existing design and fabrication strategy to meet stringent radial gap requirements
