

Extend the production capabilities of your offshore assets.

PRODUCT APPLICATIONS

- Increase platform production with additional wells
- Increase production from existing assets

PRODUCT BENEFITS

- High value addition to platforms
- Retrofit clamp on solutions, with no offshore fabrication requirement
- Full 3D-modelling and interface checking
- Installation supported as standard
- Not restricted in range or direction by the existing well bore
- Systems available that require no ROV or diver operations
- Standard systems utilise ROV/diver friendly tooling
