

# AQC Surface and Subsea Connectors

AQC-SR

AQC-BC

AQC-CW

Our AQC connectors have all been designed, developed and qualified by our in-house team of expert riser system engineers to reduce lead-times, capital and operational costs. This patented technology offers unrivalled efficiency gains and enhanced safety during operations.

As an OEM for oilfield equipment, we can provide our AQCs as part of a complete installation package, or as standalone items. It's a unique offering that gives customers significant technical advantages, as well as both opex and capex savings.

Our range of Aquaterra Energy AQC designed and manufactured riser system connectors include:

**AQC-SR:** Subsea High-Pressure Drilling Riser Systems

**AQC-CW:** Subsea and Surface Completion and Workover riser

**AQC-BC:** Surface riser and surface BOP connector

As a drilling riser system specialist, we also supply a variety of other connectors which can be integrated into subsea or surface riser applications, ensuring a fully optimised solution.

All connectors can be made available to rent on their own with the complete suite of running and operating equipment, or as part of a complete riser supply. In addition, we can provide a trained team of installers and a full range of installation equipment to assist offshore operation support.

## Key Product Features

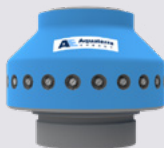

- ✓ OEM designed and tested
- ✓ Fatigue compliant
- ✓ Range of ratings available, from 5-15k PSI
- ✓ Qualified to ISO 13628-7 and/or API 16a
- ✓ Fast and efficient rig make-up
- ✓ No loose parts
- ✓ Gas tight sealing technology
- ✓ HPHT operations
- ✓ CCS operations

## Other Riser and Wellhead Connectors

As a riser system specialist, we also supply a variety of other connectors which can be integrated into subsea or surface riser applications, ensuring a fully optimised solution. All connectors can be made available to rent on

their own with the complete suite of running and operating equipment, or as part of a complete riser supply. In addition, we can provide a trained team of installers and a full range of installation equipment to assist offshore operation support.

### Other connectors available are:

- ARC -G
- VAM TTR
- Vetco/Baker Hughes NT2
- TFMC Speedloc
- Cameron Fastlock
- API Hub Clamps
- DWHD H4 Connectors
- ExF H4 Connectors
- Collet Connectors
- LP Over Shots
