

AQUASCOPE SUBSEA CAMERA SYSTEMS

Subsea Camera Systems available for immediate rental via our Aquaterra Express service.

PRODUCT APPLICATIONS

- Internal well inspections
- Internal inspections of well components
- Seabed surveys
- Installation of subsea equipment
- Cement return monitoring
- Decommissioning cut verification

PRODUCT BENEFITS

- Provides visual information/verification of the subsea operation 24/7
- Quick and easy to deploy, regardless of sea state
- Reduced capex and opex - no large ROV spread, only one person required for operations also aids decision making, saving rig-time
- Improved safety - can be installed in locations where ROVs cannot access, removing the need for divers
- Fast lead time - as part of Aquaterra Express rental tools and equipment service
