

PRESS RELEASE

Aquaterra Energy celebrates 2000 days with zero LTI's

Aquaterra Energy Ltd is celebrating a remarkable health and safety milestone, achieving 2000 days with no Lost Time Incidents (LTI's). The offshore engineering company, which manages projects worldwide, has put great focus on safety performance since the company was established in July 2005. This has led to Aquaterra never having a single lost time incident in its history.

Aquaterra Energy's commitment to health and safety onshore and offshore is embraced in the company's corporate strategic plan, which is followed by all staff and contractors. The company is dedicated to ensuring that the potential for accidents, incidents and ill-health is minimised through their daily activities.

Committed to delivering the highest standards in the oil and gas industry, the quality of Aquaterra's products and services is, to no small degree, dependent on ensuring that they are delivered in a safe and sustainable manner. The engineering company has also embraced a responsibility to reduce their environmental impact, which is demonstrated through their ISO 14001 certification.

Aquaterra QHSE Manager, Doug Lawrie, said: "Our ongoing commitment to quality, health, safety and the environment has translated into excellent standards, reflected by the fact that Aquaterra Energy has never had a reportable or lost time event in its history."

"Whilst we are extremely proud our achievements, it does not leave room for complacency and Aquaterra continue to implement improvement initiatives which have become part of our company culture."
