

JACK-UP DRILLED EXPLORATION/ APPRAISAL WELL CONDUCTOR ANALYSIS

Available as part of our in-house Riser Analysis service.

PRODUCT APPLICATIONS

- Verify that your conductor/ riser system is fit for purpose and meets regulatory requirements
- Improve operating envelopes and reduce rig downtime
- Provide guidance to ensure you are selecting the right equipment for the job
- Reduce risks offshore by having analysis-driven solutions in place

PRODUCT BENEFITS

- Provides cost savings through improved equipment selection and reduced rig downtime that far outweighs the price of the analysis
- Understanding the equipment and rig requirements enabling well-informed and cost effective choices
- Provides you with key operational information, such as tension requirements, to make your well a long-term success
- Reduces risk by having solutions in place, such as knowing your minimum conductor cement returns, minimum pipe thickness, pipe material grade, connection types etc.
